THE SOVIET UNION AND SCANDINAVIA:

A BIBLIOGRAPHY OF THESES AND DISSERTATIONS IN GEOGRAPHY

by

Sandra J. Lamprecht
Geography Librarian
California State University

INTRODUCTION

Master's theses and doctoral dissertations add much to knowledge as well as reflect changes in the approach to various subject disciplines, yet bibliographical surveys to specific topics is oftentimes not easily accessible. This bibliography has been compiled in the hopes that it will bring these valuable sources of information to the attention of planners, geographers and other researchers involved in the analysis and study of the Soviet Union and Scandinavia.

The bibliography is divided into three major sections: I. The Soviet Union II. Scandinavia (comprising Denmark, Norway, Sweden, Finland and Iceland) III. Scandinavians and Russians in America. Within each section the dissertations and theses are entered under one or more subject headings which I have selected solely on the basis of title. Author, title, degree-granting institutions, date and degree earned are provided for each entry with an author index concluding the work. Only English language dissertations and theses, most of which are accessible on microfilm or through interlibrary loan, have been considered for inclusion.

The variety of themes selected for study has made THE SOVIET UNION AND SCANDINAVIA interesting to compile: I hope that many more illuminating studies will be conducted on these Northern European lands and their peoples.
